

# MEET THE SHORTLIST FOR:

## BEST TECHNOLOGY FOR ELITE PERFORMANCE

### 15TH CLUB, THE RYDER CUP

Europe's 2018 Ryder Cup Captain, Thomas Bjørn, entrusted 15th Club to deliver a competitive edge by leveraging its global database, AI engine and golf intelligence team to surface decision-relevant insights to support the team. 15th Club contributed data-driven intelligence to wildcard picks, course strategy and pairing selections including the now infamous Moliwood partnership.

### KINETIC PERFORMANCE TECHNOLOGY, GYMAWARE

GymAware generates validated performance metrics on lifts performed by athletes. Real-time data is instantaneously fed back via an iPad, then collected in the Cloud for further analysis online. Combined with globally accessible Leader and Effort boards, GymAware raises training session intent, motivating and engaging players whilst allowing coaches to quantify work done.

### K-MOTION

K-Motion products raise awareness of athletic performance through 3D motion data. Advanced algorithms in the software help coaches prescribe the exact drills needed to correct specific movement. K-MOTION has established itself as the market leader, taking golf and baseball by storm. K-MOTION also works in other sports, including hockey and ski jumping.
