

MEET THE SHORTLIST FOR:

BEST INNOVATION OF THE YEAR

BT SPORT AND EE DELIVER 5G

EE and BT Sport teamed up to showcase 5G's potential change to the way sport is captured and broadcast by delivering a two-way broadcast over 5G from Wembley Stadium to London ExCel Exhibition Centre in November 2018. The FA recognized EE Wembley Cup 2018 as the world's first live official 5G sporting event.

EUROPEAN TOUR, SHOTCLOCK MASTERS

ShotClock Masters, the new, time-pressured form of golf, was held in Austria in June 2018. It was the first time a competitive ranking golf tournament had implanted a shot clock for every player, on every hole for every shot. The app created to support this was the first app-driven, Shot Clock system in sport and the first digital Carry Board scoring system in golf.

HAWK-EYE, NASCAR

Hawk-Eye Innovations designed a new, structured, light-based Optical Scanning Station for NASCAR's 2018 season. It completes a full body-scan of any car, generating a 700,000-point cloud that compares a 3D car model against the original race specification computer-aided design model. Areas that aren't in compliance are highlighted, then necessary adjustments made to ensure legality amongst teams.

HAWK-EYE LIVE BALL TRACKING

Hawk-Eye Live is a real-time ball tracking system, which determines if a shot is in or out as it lands. Traditionally happening once the point ended but now in real-time, line calls can now be called live. Using technology based on HawkEye's Goal Line technology, adapted for tennis, it utilises added system intelligence, automation, and a dual-redundant setup for the highest level of reliability at every event.

SCISPORTS INSIGHT

SciSports created the SciSkill Index to determine the quality / potential of 200,000+ players worldwide. SciSports' platform, Insight, provides an efficient, clear overview of all players available at a given level or potential. This technology is available for all clubs at all levels, so it provides the opportunity for an equal playing field in the area of sports analytics.

VALD PERFORMANCE

The GroinBar Hip Strength Testing System epitomizes Vald Performance's philosophies, providing easy-to-use, accurate and reliable data on groin and hip strength in under one minute, as well as on a host of other muscle groups. Requested by the industry, validated by research, the GroinBar is the new standard of hip/groin measurement.
