BEST INNOVATION OF THE YEAR

BT SPORT AND EE DELIVER 5G

EE and BT Sport teamed up to showcase 5G's potential change to the way sport is captured and broadcast by delivering a two-way broadcast over 5G from Wembley Stadium to London ExCel Exhibition Centre in November 2018. The FA recognized EE Wembley Cup 2018 as the world's first live official 5G sporting event.

Here's what the judges said:

The technology allows cost reduction, and innovative data transfer using 5G support is really a big step. Whilst the companies involved are multi-billion dollar businesses, they are pioneering the next wave of possibility in sports broadcasting.
